

# ***INFRASTOR***

TRANSPORT & GENERAL CONTRACTING

## COMPANY PROFILE 2026

# **Building Infrastructure. Moving Possibilities.**

Integrated contracting, transport, equipment rental, landscaping, and oil & gas support services across the United Arab Emirates.

# Company Overview

Infrastor Transport & General Contracting L.L.C - S.P.C is an Abu Dhabi-based company established in 2016 to deliver dependable contracting, transportation, equipment rental, landscaping, and industrial support services. Our operating model combines technical capability, responsive project coordination, and disciplined field execution.

We support public and private sector clients with solutions covering buildings, roads, irrigation, drainage, sewerage networks, transportation of materials, passenger transport, heavy equipment rental, landscaping, and onshore and offshore oil and gas facilities services.

## 2016

### Established

Serving the UAE market with practical, project-focused solutions.

## 12

### Licensed Activities

A diversified service portfolio across contracting, transport, rental and landscaping.

### Abu Dhabi

Strategically positioned to serve projects across the emirate and wider UAE.

### Single-Owner LLC

Efficient governance and clear management accountability.

**“We deliver dependable field services with safety, quality and customer confidence at the center of every project.”**

# Leadership Message

**Our ambition is to be a trusted UAE partner for infrastructure, transport and general contracting services by combining reliable execution with long-term client relationships.**

At Infrastor, we understand that every project depends on careful planning, capable people, suitable equipment, and timely coordination. We therefore focus on practical delivery, transparent communication, and responsible management of resources.

Our business has been built around the needs of clients who require a dependable service partner capable of responding across multiple disciplines. Whether the assignment involves roads, networks, buildings, material transport, equipment rental, landscaping, or support to oil and gas facilities, our team approaches the work with commitment and professionalism.

We continue to strengthen our systems, workforce, partnerships, and operational readiness so that we can support larger and more demanding projects while maintaining the standards our clients expect.

**EISA ALI SALEM ALI ALSHAMSI**

Owner & Manager

# Vision, Mission & Values

## Vision

To become a preferred UAE partner for transport, infrastructure and general contracting services, recognized for reliability, responsiveness and professional execution.

## Mission

To provide safe, practical and cost-effective services through capable people, suitable equipment, disciplined project controls, and strong collaboration with clients and stakeholders.

## Core Values

### Safety First

We protect people, assets, the public and the environment.

### Quality Delivery

We aim for right-first-time execution and continuous improvement.

### Integrity

We act honestly, responsibly and transparently.

### Client Commitment

We listen, respond and build lasting working relationships.

### Teamwork

We coordinate across functions and support one another.

### Accountability

We take ownership of commitments, resources and results.

# Contracting Services

## **All Kinds of Building Projects Contracting**

General building project execution, coordination and associated site works, subject to applicable classification requirements.

## **Main Roads, Streets & Related Works**

Road infrastructure works and associated civil activities for public and private developments.

## **Irrigation Network Contracting**

Installation and coordination of irrigation networks supporting landscape and development projects.

## **Main Sewerage Network Contracting**

Infrastructure works relating to primary sewerage networks and connected civil requirements.

## **Rainwater Drainage Contracting**

Drainage network works designed to support effective stormwater management.

## **Afforestation Contracting**

Plantation and greening works that support urban, roadside and environmental development.

Activities marked for contractor classification are undertaken only where the required classification and authority approvals are in place.

# Transport & Equipment Solutions

## Heavy Truck Material Transport

Planned movement of general materials using heavy trucks, coordinated to project schedules and site requirements.

## Light Truck Material Transport

Responsive transportation support for smaller loads, tools and project materials.

## Passenger Transport

Transportation of personnel through rented buses in support of project and workforce mobility needs.

## Heavy Machinery & Equipment Rental

Rental support for heavy machines and equipment required for construction and field operations.

## Our Service Approach

- Route and delivery planning aligned with project priorities.
- Coordination with client representatives and site teams.
- Attention to equipment suitability, availability and safe operation.
- Flexible deployment for project-based and ongoing requirements.
- Clear documentation and communication throughout service delivery.

**One coordinated partner for multiple project support needs.**

# How We Deliver

## 1. Requirement Review

We confirm the scope, location, schedule, interfaces, approvals and client expectations.

## 2. Resource Planning

We identify manpower, vehicles, equipment, suppliers and supervision requirements.

## 3. Mobilization

We coordinate permits, access, logistics, site readiness and operational controls.

## 4. Execution & Monitoring

Work is supervised against agreed priorities, safety requirements and quality expectations.

## 5. Communication

Progress, constraints and required decisions are communicated to relevant stakeholders.

## 6. Completion & Closeout

We verify completion, resolve outstanding matters and provide required records.

# Quality, Health, Safety & Environment

Infrastor is committed to organizing its services so that work is delivered safely, responsibly and in line with client requirements. Our operational controls are designed around planning, competent supervision, clear communication and continual improvement.

## Quality

- Clear scope and acceptance criteria
- Planned inspections and verification
- Control of suppliers and resources
- Corrective action and improvement

## Health & Safety

- Hazard identification and risk control
- Site induction and toolbox communication
- Suitable PPE and safe work practices
- Incident reporting and learning

## Environment

- Waste control and housekeeping
- Prevention of spills and pollution
- Responsible use of fuel and materials
- Protection of surrounding areas

## Compliance

- Applicable licences and approvals
- Client procedures and site rules
- Competency and equipment records
- Documented operational evidence

# Why Choose Infrastor

## Diversified Capability

Contracting, transport, equipment rental, landscaping and industrial support under one company.

## Local Market

### Understanding

Established in Abu Dhabi with knowledge of local project environments and stakeholder expectations.

## Responsive Coordination

Direct management involvement and practical decision-making for project needs.

## Scalable Resources

Flexible planning of vehicles, equipment, personnel and subcontracted resources.

## Client-Focused Delivery

Clear communication, dependable service and commitment to agreed outcomes.

## Long-Term Partnership

A relationship-based approach aimed at repeat business and sustained trust.

**Reliable resources. Coordinated execution. Practical results.**
